The Conference: Exploring Chemistry

The Exploring Chemistry conference aims to motivate and inform students studying chemistry at both A and A/S level. Through the conference, it will become clear that chemistry is one of the most important and exciting subjects open for young people to study. Specifically the conference will show that an understanding of chemistry is essential for any who wish to study science, medicine, pharmacy or veterinary medicine in the 21st century. Exploring Chemistry achieves its aims through both the range of topics and the choice of speakers, offering students an in-depth insight into modern chemistry.
